TION USE! Directions-The dose is usually from half a teaspoonful to a tablespoonful, or more in dangerous cases, varying according to the age of the patient and severity of the disease—to be repeated every five, ten or twenty minutes till relief is obtained. In severe attacks in which an immediate action is necessary, it should be given clear. The more dangerous the case the larger should be the dose, and the more frequently repeated. In cases of a mild nature the dose may be lessened and diluted accordingly. It may be given if convenient in about half a gill or half a tea capful of warm mint or sage tea, or warm water sweetened, if preferred, to make it more palatable.

ENEMA OR CLYSTER .- If necessary to act immediately on the bowels enough for a dose should be put in about half a gill or half a pint of lukewarm water, varying according to the age, and given by injection to aid in bringing about a re-action. For children this is often the best mode of administering, especially when an immediate action is necessary

EXTERNAL USE -In cases in which there is inflammation arising from external injuries, or in inflamed sores or boils, bath with it frequently to reduce the inflammatory action and relieve the soreness For sale in this Village by Drs. A. G. & T. J. TEAGUE and G. L. PENN. Jan 27
